

Product features and key data

Mains voltage	12 V
Ingress Protection (IP) rating	IP20
Ambient temperature	-20 - 45 °C
Net length	46,40 mm
Net width	20,40 mm
Net height	15,80 mm
Weight	0,2 kg

LiveLink LightGrid sensor unit with integrated PIR presence sensor and light sensor for connection to a LiveLink LightGrid controller. Passive infrared presence sensor, with settable switch-off delay time, optionally in automatic mode (automatic On, automatic Off) or semi-automatic mode (automatic Off, manual On). Temperature range -20 °C - +45 °C. Detection range Ø 6 m, Mounting height 3 m. Permissible installation height: 3 m - 14 m. Connection of the LightGrid sensor to the controller via a separately ordered RS-485 bus line. Colour white. Ceiling mounting on standard cavity wall socket with separately orderable mounting ring with two fixing screws. Tool-free fixing of the sensor in the cover cap. Housing dimensions (L x W x H) 46,4 mm x 20,4 mm x 15,8 mm. Settable parameters: nominal value for constant light control, switch-off delay period, semi-/fully automatic. Constant light control with switch-off function with sufficient daylight. Electrical supply via the 9V interface of the controller.
