The REACH regulation (EC 1907/2006)

Dear Sir or Madam,

Regulation (EC) No. 1907/2006 (REACH Regulation) is an EU chemicals regulation that came into effect on 1 June 2007. REACH stands for Registration, Evaluation, Authorisation and Restriction of Chemicals.

Regiolux GmbH recognises its responsibility and complies with the requirements set by REACH by requiring our suppliers to provide information about any hazardous substances contained in their products.

Since we do not manufacture or import chemicals or preparations ourselves, we are classified as downstream users under REACH. Our product range consists exclusively of non-chemical articles as defined in Article 3 of the REACH Regulation. Moreover, no substance should be released from the purchased articles under normal and reasonably foreseeable conditions of use.

The SVHC candidate list (Substances of Very High Concern) under Article 59 is updated periodically at irregular intervals - please refer to the European Chemicals Agency (ECHA):

SVHC Candidate List Table

<https://echa.europa.eu/candidate-list-table>

With regard to our communication obligations under Article 33 of REACH, we would like to inform you of the following:

According to current information, no substances from the current candidate list are present in all our products or their packaging in concentrations greater than 0.1% by mass. Excluded from this is the following product containing the following candidate list substance in a concentration of more than 0.1 mass %.

Intended use	Substance name	EC no.	CAS no.
Nickel-cadmium accumulators	Cadmium	231-152-8	74440-43-9

We will of course inform you immediately about changes to our products caused by REACH within the framework of our business relationship.

Kind regards from Königsberg,

Regiolux GmbH
