

1) Sensing surface, 2) Tightening torque, 3) see remarks, 4) Data carrier installation, 5) Data carrier, 6) Caution: Protect eyes, 7) Replace data carrier

Basic features

Principle of operation	Holding RFID system
Use	Holder for data carriers BIS L-103/203

Environmental conditions

Ambient temperature	-25...85 °C
Storage temperature	-40...85 °C

Material

Material	POM
-----------------	-----

Mechanical data

Dimension	Ø 16 x 18 mm
Mounting part	Clamps
Weight	3.00 g

Remarks

For installation in metal: Observe clear zone.
 Only when used together with the appropriate read/write head.
 This holder fixes the data carrier using a prismatic clamp and prevents it from falling out. The holder uses plastic deformation for clamping. Empirically determined press-in force 4) , life expectancy 5 ... 10 cycles data carrier per holder. When replacing the data carrier note 3) and location.
 Torsional, bending and impact loading is not permitted.
